

What's in a **BABY PLAN?**

We offer several packages to clients wishing to document their baby's first year of life. Each moment, from maternity to their first birthday, is incredibly special and fleeting. We love watching your baby grow and love documenting your amazing family story. The love and memories we capture during the first year of Baby's life will remain with you long after they've grown; and trust us, they do grow up so fast! These photographs also make excellent gifts for family members and beautiful gallery-style artwork to decorate your home.

PIXIE PERFECT PHOTOGRAPHY

PRESENTS

Everything

you need to know

for your

MATERNITY

SESSION!

your MATERNITY SESSION

Whether it's your first or fourth, pregnancy is a rare, fleeting time in your life. Your body is transformed in beautiful ways to reflect the new life growing within. You are becoming a mother.

Maternity photographs quickly become treasured family heirlooms. We work with each client individually to create an unforgettable experience documenting a very special time in their lives. We believe baby bellies are beautiful and something to celebrate, commemorate, and share with your little ones as they grow older.

You may choose to have your maternity session as just the two of us; a private, intimate quiet affair; or we can include Dad, siblings, and close family members. This is your day, your session. You get to decide how you'd like it to be!

CHOOSING A LOCATION

Whether it's in your home, or on location the location of your photo-shoot sets the mood and tone for the images! Some women are more comfortable taking photos in a home setting, while others prefer a beautiful park or field of wildflowers. We are willing to travel to locations around the area, or to your home, depending on what you decide. We also have a trove of our favorite local photo spots. If you don't know what you want, just ask; we're always happy to make recommendations!

WHAT to WEAR

DO:

- Try for solids! Bright colors or muted tones can look amazing depending on the location you choose
- Choose clothing that is slightly clingy and stretchy to show off your form (cotton blends, silks, rayons)
- Long-sleeved tops and spaghetti straps are ideal
- Old, wrinkled button-down men's shirts can look fantastic
- Slightly form-fitting dresses that cling to your bump rather than hang off of it can be very elegant
- Wraps, textured scarves, and saris create a whimsical, artistic look
- Jeans and stretchy maternity pants are always a hit
- Dark colors and especially black can be slimming on camera
- Lotion, especially on knees, elbows, and hands, help your skin to glow

DON'T:

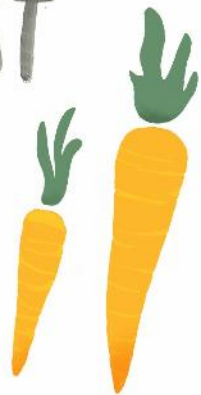

- Avoid wearing tight undergarments, especially if you plan to show off your bump bare-skinned; you don't want red marks from elastic!
- Watches and most jewelry (except wedding/engagement rings or heirloom pieces) are generally distracting from the overall picture
- Avoid baggy clothing or shirts that hang loosely - we'll lose the shape of your beautiful belly!
- Prints, stripes, and multi-color fabrics are distracting from your form

QUICK! FACTS!!

- MATERNITY SESSIONS ARE BEST DONE AT ABOUT 7-8 MONTHS INTO THE PREGNANCY FOR FULL, ROUND BELLIES
- SESSIONS CAN BE IN ANY LOCATION OR SETTING (WE ARE WILLING TO TRAVEL!)
- SESSIONS CAN INCLUDE YOUR CHOICE OF FAMILY MEMBERS
- EACH SESSION LASTS 1 HOUR

You wanted to know
ABOUT PHOTOGRAPHING
NEWBORNS
With Pine Perfect Photography

Newborn QUICK FACTS

- NEWBORNS ARE BEST PHOTOGRAPHED BEFORE 14 DAYS OF AGE
- NEWBORNS LOOK BEST PHOTOGRAPHED NUDE WITH SOME SMALL ACCESSORIES, IF DESIRED
- SESSIONS ARE GENERALLY DONE IN YOUR HOME TO REDUCE STRESS ON MOM AND BABY
- LIFESTYLE SESSIONS USUALLY TAKE UP TO 2 HOURS; POSED SESSIONS UP TO 4 HOURS
- BLOCK OUT A WHOLE DAY FOR THE PHOTOSHOOT TO ENSURE EVERYONE IS AT THEIR BEST!

WHAT to EXPECT

from LIFESTYLE SESSIONS

For those with a fussy baby or wanting whole-family images, a lifestyle session might just be the perfect thing! Lifestyle sessions are photoshoots that capture your new bundle of joy (and you, too, if you'd like!) in natural poses and a natural setting. Popular choices for lifestyle images include baby held in Daddy's arms, Mom, Dad, and Baby together, photos with the family pet, or larger group shots. Lifestyle images are taken with natural light (the Sun!), generally in a room with lots of light and windows. A lifestyle session is casual, relaxed, and quick; no more than 2 hours. We'll work with you and baby to book a time that's happy for everyone. Lifestyle sessions can be taken with babies of any age!

from POSED SESSIONS

Our posed newborn sessions are always a smash-hit with friends and family! Posed sessions involve patiently waiting for Baby to fall asleep, then gently posing him or her on a soft pillow to look like a little doll. These sweet images will melt hearts for years to come, but they aren't easy to get! A posed session may take up to 4 hours (entirely depending on Baby), and must be done in a heated room (over 80 degrees!). We recommend scheduling the session around your baby's sleeping schedule; during nap-time or bed-time is best. Knowing your little one's sleep schedule and tiring Baby out the day before are key to a successful posed session.

KEY TIPS

- Make sure your baby is very fed before the session! This will help keep him or her calm
- Avoid tight diapers/elastic clothing before the session; you don't want to get red marks on Baby's perfect creamy skin!
- Tire your baby out as much as possible the day before and hours before the session
- Heat the room where we're going to be shooting in well in advance of photographer arrival
- We ask that photographer and baby are left alone during posed sessions to ensure best results. Your job is to relax!
- Accessories for baby such as textured wraps, heirloom blankets, headbands, knits, and crochet hats look great on camera

Taking photos at **SIX MONTHS**

Six-month sessions are exciting, lively, and fun! Your bundle of joy is probably the center of attention at almost any gathering, rolling around the play area and cooing to admiring onlookers. Some prefer to have their six-month old photographed nude, while others love to dress Baby up in a super-cute outfit for the camera! If you're going the well-dressed route, soft, comfortable, loose-fitting natural fabrics (such as cotton or cotton blends) will keep your little one smiling for the birdie! Bright colors, bold patterns, and large, safe props look great on camera. Sessions can be in your choice of location.

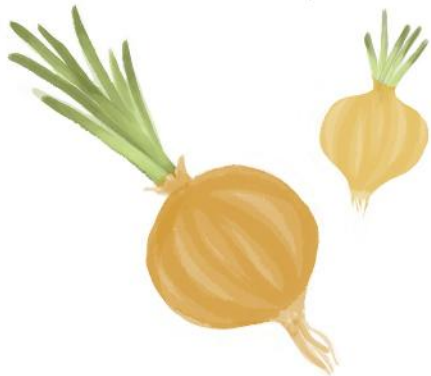

Celebrating **ONE YEAR**

There are so many wonderful ways to document your little one's first birthday! From a romp in the local park at Sunset to the toy room in the comfort of your home, one-year sessions are a blast. Our most popular choice for first birthdays is the Cake Smash session, where Baby gets to have cake for the first time. These sessions generally result in an irresistibly adorable blend of happy baby, frosting, and cake crumbs flying everywhere - especially onto Baby's face! If your baby has dietary restrictions, fear not - successful Cake Smashes have been carried out with everything from frozen yogurt to homemade sugar-free cupcakes. We look forward to planning a smashingly awesome one year session with you and your family!

SPREAD the WORD

A kind word about
Pixie Perfect
Photography
to a friend or family member
is the best compliment
you can give.

Our referral program is simple. If you've loved your experience with Pixie Perfect Photography, tell your friends and family about it. If they decide to work with us as well, both you and your friends will receive a gift.

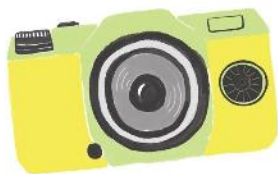

If a new client mentions your name when booking their session with Pixie Perfect Photography I'll **give them a free 8" x 10" print** as a thank-you for their business. We will also give you a **free 8" x 10" print and 30% off your next print order** as a token of our gratitude!

ABOUT *the* PHOTOGRAPHER

We've been documenting family stories since 2010, and we've been loving every moment of it. Watching bellies grow, babies develop, and families come together in beautiful moments is one of our greatest passions. Our focus is to capture love in its many forms and make small, special moments last forever. Although your little one will never be this little again, you will have images that document your child's first days of life to enjoy over and over again.

Many describe our style as natural, emotional, and glowing. We specialize in the use of natural light to tell your family stories. We try to document things just as they are, and find the beauty in everything around us.

Working with a professional photographer is a relationship. Many of our clients become dear friends long after we've taken their photograph. The people we've met along the way during our 3 years in business have enriched our lives and helped to shape our business into what it is today.
